LOIC HAZOUME

Full Stack Developer | 30+ Shipped Sites & Apps | TypeScript ·
React · Node.js · Python | Open to Opportunities

Canada

Summary

I'm a full stack developer actively seeking my next role on a team where I can ship great products. Over the past 3 years I've built 30+ websites and web applications from scratch; for real clients, with real users, in production today. That work has given me the kind of experience you can't get from tutorials: scoping projects with clients, making architecture decisions under real constraints, debugging in production, and delivering on deadline across industries I'd never touched before (real estate, insurance, plumbing, marketing, education, e-commerce). My most technically complex project is DomainEx.app; an AI-powered ad intelligence platform with a Neural ROI Simulator, Server-Side Attribution, Audience Builder, Competitor Benchmarking, and an Automation Rules Engine. It integrates with the Meta Graph API and TikTok Marketing API via OAuth 2.0, syncs data every 30 minutes, and is built in TypeScript/React with a Node.js/Python back-end. I've loved the independence of freelance and contract work, but what I want now is a strong team; code reviews, shared ownership, mentorship, and the chance to build something bigger than what one person can do alone. I'm ready to bring everything I've learned shipping 30+ projects into a role where I can contribute from day one. Before development, I spent years in technical support and operations; so I build with the end user in mind, not just the spec. Tech: TypeScript, JavaScript, React, Node.js, Express, Python, Flask, Django, REST APIs, OAuth 2.0, PostgreSQL, MongoDB, HTML/CSS, Git, GitHub CI/CD. Actively looking for full stack, front-end, or back-end roles — remote or on-site in Canada. Reach me at jerryhazoume@gmail.com

Experience

ATA

Full Stack Engineer

August 2023 - Present (2 years 9 months)

Canada

Building and shipping full stack web applications; 30+ sites and apps deployed to production and counting.

Flagship product; DomainEx.app (AI-Powered Ad Intelligence):

- Designed and built DomainEx from the ground up; a SaaS platform featuring a Neural ROI Simulator, Server-Side Attribution engine, Audience Builder, Competitor Benchmarking tool, and Automation Rules Engine
- Integrated directly with Meta Graph API and TikTok Marketing API via OAuth 2.0, with automated data sync every 30 minutes
- Implemented secure authentication flows including token refresh, permission scoping, and session management
- Built the full stack in TypeScript/React (front-end dashboard) with a Node.js/Python back-end, RESTful API layer, and database architecture
- Live in production at domainex.app

Client & venture sites (20+ deployed, all from GitHub):

- Centurion — luxury real estate platform with cinematic property showcases
- NorthwestMedia.ca — growth consulting agency site ("Growth Is Not a Guessing Game")
- Inicomedia.com — branding agency site ("We build brands that move markets")
- Liboulene — 8-week digital skills program helping adults enter the job market
- Legacy Care Canada — insurance/final expense coverage platform
- Lem B Plumbing — local service business site with lead generation
- Maison Hiyaa, Zeninit, Depth0, FAN-STORE, and 15+ more across real estate, finance, education, and services

Stack: TypeScript, JavaScript, React, Node.js, Express, Python, OAuth 2.0, Meta Graph API, TikTok Marketing API, REST APIs, MongoDB, PostgreSQL, Git, GitHub CI/CD

WXZA Inc.

Founder

August 2019 - Present (6 years 9 months)

Ottawa, ON

Built and ran a full stack web development practice under WXZA Inc., delivering 20+ client websites and developing internal platform tools across multiple industries.

Client work (20+ production sites):

- Delivered full stack websites for clients in real estate (Centurion), insurance (Legacy Care Canada), local services (Lem B Plumbing), marketing (NorthwestMedia.ca, Inicomedia.com), education (Liboulene — an 8-week digital skills program), and more
- Managed full project lifecycle for every engagement: requirements gathering, design, development, testing, deployment via GitHub CI/CD, and post-launch maintenance
- Learned to scope work, communicate with non-technical stakeholders, meet deadlines, and adapt quickly to unfamiliar industries

Internal platform development (wxza.net):

- Built 9 interconnected web applications as internal tools and R&D projects, including a financial infrastructure prototype (Bank 2.0), an AI cybersecurity concept (Ozea), a real-time monitoring dashboard (Live), and a prototyping environment (Proto)
- Designed and maintained the full deployment pipeline; all projects deploy from GitHub

This experience taught me how to ship fast, work across completely different problem domains, and own projects end to end. Now I'm ready to bring that into a team environment.

Stack: TypeScript, JavaScript, React, Node.js, Python, HTML/CSS, Git, GitHub CI/CD, Figma, Vercel

PROMECHANIX

Logistics Support Specialist

August 2023 - August 2025 (2 years 1 month)

Montreal, QC

Provided operational and customer support in a fast-paced warehouse and logistics environment.

- Processed 80+ customer orders per day, maintaining 97% accuracy in order fulfillment
- Resolved customer inquiries related to inventory, shipping, and order status; averaging 30 tickets per day
- Collaborated with warehouse team to improve inventory tracking workflows, contributing to 15% reduction in fulfillment errors
- Trained 5 new team members on order management systems and customer communication protocols

Gatestone & Co.

Technical Support Specialist

August 2022 - May 2023 (10 months)

Montreal, QC

Delivered frontline technical support for business and consumer clients, diagnosing and resolving hardware, software, and network issues.

- Handled 1,200+ support tickets over 10 months, maintaining 85% first-call resolution rate
- Troubleshoot issues across Windows and Mac environments, VPNs, and enterprise software tools
- Documented common issues and solutions, building an internal knowledge base that reduced repeat ticket volume by 20%
- Consistently rated 4.5/5 in customer satisfaction surveys

Circle K

Senior customer service specialist

March 2018 - November 2020 (2 years 9 months)

Montreal, QC

Managed day-to-day operations at a high-volume Esso/Circle K retail location, overseeing sales, staffing, and customer experience.

- Supervised a team of 8 associates, handling scheduling, training, and performance management
- Managed daily cash reconciliation for a location processing 500+ transactions per day
- Maintained inventory accuracy across 2,000+ SKUs, reducing shrinkage by 12%
- Achieved 92% customer satisfaction scores through staff coaching and service standard enforcement
